II. Approval of Minutes

-January minutes approved

III. New Business

Discussion: Salt for snow removal may need to change, still slippery when walking

Action: Pierre will investigate a different type of salt for snow removal. More rugs have been used in previous years and should be implemented to remedy some slip and falls

Discussion: Request for hand towels and hand soap in gender neutral restrooms

Action: Hand towels were flushed in the past so hand dryers were put in restrooms to replace the need for towels. We have hand towel holders in the restrooms, but no hand towels and the towels are needed for more than just drying hands; spills, accidents etc. Will revisit during next month's meeting.

Discussion: Handicap access to building in West Regional Center

Action: There is no handicap accessibility at either Ludlow or Chestnut St. entrance at the West Regional Center. The door was not automated at Ludlow entrance because it is a part of a larger project

IV. Old Business

Discussion: Handicap access to bathroom- Update

Action: Restroom outside of library is being automated for handicap accessibility and should be finished within a month. Pierre stated the lip for the bathroom is standard height. Will revisit next month for update on automating more/all restrooms for handicap accessibility

Discussion: Elevators are constantly down- Update

Action: An investigation of the elevator has shown that it was unlevel due to the “close door” button being pressed. The elevator at CATC, the contract must be honored or switched to a new company. The freight elevator at Main, Pierre is working on swipes for only employees to be able to use it and hopefully that will remedy the issues. The freight elevator is newer, but facilities believes we should be looking at modernizing the elevators
